# FEATURES OF THE WEB PAGE

Home - an introductory Web Page and an About Me section.

My Journey - picture I made on Canva (moodboard) and inserted text, centred using CSS, text-align property and aligned properly through the use of margins.

My Projects and Coding Courses - including relevant pictures and relevant fonts, links to the projects and courses

My Work History - image made on Canva which summarises my work history.

My Interest - have text to describe the point using CSS.

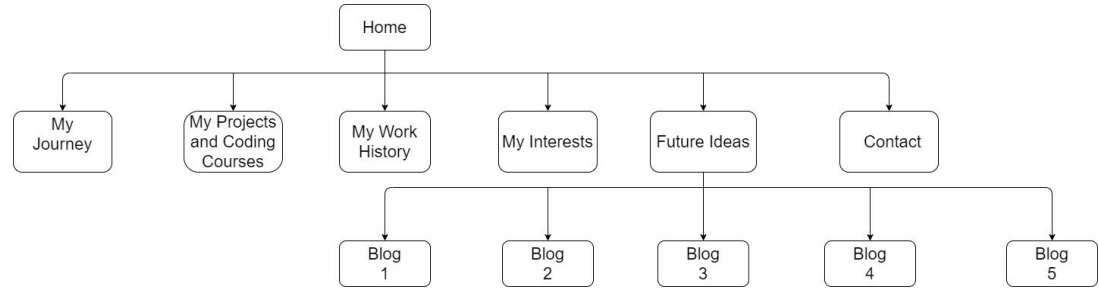

Future ideas – Flexbox is used and blogs are made in alphabetical order and are summarised briefly, read more section will take you to the right article. Borders and padding are added to appropriately space out the blog.

- Black for my background.
- FlexBox for my website and used Flex-Direction, display:flex and wrappers.
- I also used a link for my resume and referee letter.
- Pictures included in different sections.
- Used the hover Button.
- Used Google Fonts.
- Used justify-content to make site more presentable to audience.

# ETHICAL ISSUES

- Whether the website can be seen well on Mobile View?
- Whether the Website is an accurate presentation of me?
- Whether the site is easy to navigate?
- Whether the site aesthetically looks good?
- Is the site ethical?
- Is the site easy to see?
- Can everything be safely navigated through the website?
- Does the website have compelling content?
- Is the website accurate?
- Can potential employers navigate to the site well?
- Can people understand it?
- Will the website achieve its purpose?
- Will the website be fruitful?
- Subresource Integrity security issues. Is the website secure from threats?

# COMPONENTS BEING USED

- The header to add a black background and reposition the nav bar and the image perfectly on my page.
- Repositioned various text such as h4 to either centred and justified passages on the website.
- Divs to align articles and article blogs.
- Style.CSS to style my components to make my website.
- Git push, pull and add the project.
- Finally I used HTML to position my text and add appropriate text and structure my website.

# CHALLENGES

- Position images appropriately
- Learning how center and justify text.
- And getting general aesthetics right.
- Getting the blog right and making it look professional.
- Doing links and Favicons (doing this).
- Making button and hover properties.
- And doing and learning animations.
